BPD ZENITH

DRAG AND DROP FEATURE FOR MAXIMO

Knowing our customers pain points within Maximo is what drove us to develop the Drag and Drop for Maximo feature.

This custom control can be added to any application within Maximo which supports attachments. It allows the user to simply drag multiple files and drop them into the drop zone of the control rather than adding files through multiple clicks. BPD's Drag & Drop for Maximo streamlines your attachments process.

If you would like to know more about this or any other product BPD Zenith is developing, please contact us.
