BPD ZENITH

ATTACHMENT BY EMAIL FEATURE FOR MAXIMO

BPD developed the Attachment by Email for Maximo feature whilst working out ways to save precious time when using Maximo.

We have developed a way to attach files to a record in Maximo without opening Maximo itself. This is particularly useful when a time poor contractor needs to submit weekly reports for Work Orders but doesn't have the time to extract files. This feature ensures no email is lost and admin tasks are completed efficiently and on time.

If you would like to know more about this or any other product BPD Zenith is developing, please contact us.
